### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 12-19, drawn to a motor with fluid bearing, classified in class 384, subclass 100.
  - II. Claims 11 with all limitations from parent claim 1, claim 20 with all limitations from parent claim 12, and claims 21-23, drawn to a disc drive, classified in class 360, subclass 99.08.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it can use a motor without particular features in Group I, such as "re-circulation hole.". The subcombination has separate utility such as for a device rather than a disk drive.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
